

Are you living with  
dementia?  
Or caring for  
someone who is?

## Building technology

We are looking  
to work together  
to design and  
build personalised  
technology to help  
with everyday  
lives.

Participation would involve working with a team including health and technology people to help make technology personalised to your needs. It would involve up to 10 visits to your home to try out and give feedback about the technology.

If you are interested in participating or have any questions about the study - please contact Dr Jacki Liddle at the Florence Project at the University of Queensland on:
