

SEX AND INTIMACY AFTER SPINAL CORD INJURY

Participants required for research

Looking for people who had a spinal cord injury within the last 10 years to participate in an interview.

The interview will focus on whether sex and intimacy was addressed during your recovery and how this area could be improved. Topics may include- sexual activities, relationships and reproduction.

Considering current events, the interviews will be either online or over the phone.

We understand it can be awkward to discuss, however your participation will help to improve health care.

If you would like to participate or find out more, please contact Chloe Bryant:
