

Volunteers needed for research

VIBRANT TRIAL

Three in five older adults aged over 60 have a hearing loss and the risk of falling for older adults is higher if they have a hearing loss.

Researchers at The University of Queensland are conducting a study that will test if a device that gives feedback on body position can improve balance and stability.

- Are you over 60?
- Do you have mild to severe hearing loss?
- Do you have vertigo, feel dizzy, or unsteady?

If you would like more information or would like to volunteer please contact Katrina Kemp on 07 3365 4564 or k.kemp@uq.edu.au
