

Seeking healthy middle-aged volunteers aged 40-65 for a study investigating concussion!

We are interested in how a history of concussion impacts cognitive performance in middle-aged adults, before any symptoms of cognitive aging might occur.

If you have a) never experienced a concussion
OR

b) have experienced a concussion more than 3 months ago, please consider participating in this one-hour, online study!

Payment will be a \$20 Coles/Myer gift card.

Participants must have normal or corrected to normal vision and hearing; no neurological, psychotic, or mood disorders; no alcohol or substance dependence; and not be taking any psychopharmacological medication.

JULY 2022 – DECEMBER 2022
